

Start-up Timeline

Congratulations to the first sites CIRB approved for MOST! [Houston Methodist Hospital](#), [Medical University of South Carolina](#), [WellSpan York Hospital](#), [Mercy Health Saint Mary's](#), [Yale New Haven Hospital](#), [UCSD Health La Jolla](#), and [UCSD Hillcrest](#). As many sites as possible should be CIRB approved and ready to enroll before the Investigator Meeting on **May 6, 2019**.

Regulatory Updates

All sites are required to use the CIRB-specific Partial HIPAA Waiver for Screening and the CIRB-specific Bill of Rights. Site-specific forms will not be accepted. The Partial HIPAA Waiver for Screening was disseminated in each site's CIRB packet email, and the Bill of Rights was disseminated separately to all sites on 1/17/2019. Please reach out to the NCC Regulatory Specialists, Emily Stinson (stinsoey@ucmail.uc.edu) and Jen Golan (golanjl@ucmail.uc.edu), with regulatory questions.

FAQS

Will sites be allowed to obtain informed consent over Telemedicine?

Obtaining informed consent via telemedicine for MOST may expedite enrollment procedures at Clinical Participating Sites (CPSs). MOST has a CIRB approved telemedicine consent SOP that may be adopted by CPSs if they see fit. If a CPS chooses to use their local telemedicine consent SOP, it must be submitted to the CIRB for approval.

Is there a restriction on site-specific enrollment?

There is no restriction on the number of subjects a site may enroll. Once the trial reaches the target enrollment of 1,200 subjects, the site PIs will be notified to cease enrollment.

Where and how will the 90-Day mRS video recordings be stored by Glasgow?

The 90-Day mRS video files will be uploaded to the University of Glasgow web portal which is a secure site. The web pages will only be accessible using secure socket layer (SSL) communication. The files themselves are stored on the Robertson Centre for Biostatistics servers, which are compliant with international data security standards. The servers use secure end-to-end encryption, firewall protection, and a fully documented audit trail.

The videos will be securely stored on the Robertson Centre servers until the conclusion of the trial whereby they will be digitally archived for 10 years. Videos are archived for trial reference only. They will not be used for any other purpose.

Congratulations to the new sites to complete their fully executed Clinical Trials Agreement!
