WEBDCU UPDATES FOR PROTOCOL v2.0

Screen Failure Form and Eligibility (F101)

CHA2DS2-VASc score ≥ 2 no longer applicable.

- CHA2DS2-VASc (F304) is still required in order to stratify treatment assignment.

Eligibility (F101) and Randomization (F102)

Q01 (*protocol version approved at time of consent*) – now includes Protocol v2.

- Choose Protocol v2.0 if subject signed ICD v5.
- If subject signed ICD v4 and you are approved for ICD v5 at time of baseline visit, re-consent and randomize under Protocol v2.0; If re-consent at Baseline visit is not possible, randomize under Protocol v1.4 and re-consent as soon as possible.

Informed Consent (F244)

Q01 (*Informed consent form version*) is now drop-down menu of version used for initial consent.

- All prior Informed Consent CRFs are consolidated to F244 with appropriate version selected.

NEW: Re-consent (F249) – manually posted for active subjects with previous ICF submitted.

Q01 (*Informed consent form version*) will automatically default to Version 5.

- Only complete for re-consents; upload initial v5 consents to F244.
