## ABCs of ASPIRE Neuroimaging Biobank

**A . AT MOST 4 NEUROIMAGING STUDIES** required for randomized subject's index ICH\*:

1. 1<sup>st</sup> diagnostic brain CT  
*If obtained,*
2. Follow-up brain CT obtained during index ICH hospitalization
3. Brain CTA or MRA obtained during index ICH hospitalization
4. Brain MRI obtained within 90 days of index ICH.

**B . IMAGING COLLECTION FORM (F508)** must be submitted for each study.

**C . DICOM FILE** name should follow this format: **Subject ID\_Image Type\_CRF ID**

**Image type** → CT, CTA, MR, MRA

**CRF ID** → Imaging Collection (F508) form number for study.

Internal labeling is inconsistent, so this file naming format is needed to link DICOM files to Imaging Collection F508 data (*i.e., subject, date, time of study*).

*\*Similar studies required for brain events during participation. See Biobank Manual for details.*
