Coordinator of the Month

Congratulations to Dorothy Trivedi from Doctors Medical Center of Modesto!

Dorothy Trivedi

Doctors Medical
Center of Modesto

A big thank you to Dorothy who randomized her first subject ever during the holidays! She also stayed at the hospital to help monitor the subject overnight. Our team recognizes how difficult this randomization was and cannot thank her enough. Her PI, Dr. James Jaffe, said she is the smartest, greatest research coordinator anyone could ever be lucky to have and that he is really lucky. Thank you Dorothy!

Do not use this email!

Please **do not** use the email sleepsmart@fusionhealth.com. It is currently listed on the Fusion requisition forms- they are working to remove this. The email address is not active. Please continue to use sleepsmarttechsupport@noxhealth.com.

Tess changes

In order to make Tess more user friendly, we have created a Qualtrics link, https://umich.qualtrics.com/jfe/form/SV_b73MvftChJgdfAa.

Now instead of having a participant text Tess for the first time, the subject's information can be entered using this link. All that is needed is subject ID, randomization assignment, and cell number!

Site Name

Subject ID

What was the subject randomized to?

Intervention (CPAP)

Control (No CPAP)

What is the subject's cell phone number?

S10 supplies

- Please use up your S10 supplies and dispense your last S10 run in night device to an intervention subject when your S10 supplies are almost depleted
- KOEO does not have separate pathways to order S10 vs S11 supplies. Until that is available, when you order humidifier basins or tubing, please email sleepsmarttechsupport@noxhealth.com to specify whether you are ordering for the S10 or S11.
- Only order S10 supplies if you have a mismatch in the number of remaining S10 tubes and basins. If you have more basins than tubes, you'll need that many extra tubes. If you have more tubes than basins, you'll need that many additional basins. If you have the same number of S10 tubes and basins, you won't need to order any additional S10 tubes or basins.
- Fusion will send you a run-in night sticker. When you have dispensed your last S10 run-in night device, please place the sticker on a new S11 that you designate as the run-in night device.
