

The VERIFY STUDY

Validation of Early Prognostic Data for Recovery
Outcome after Stroke for Future, Higher Yield Trials

Newsletter July 2022 Issue 7

Lift Off!!

It's exciting to see the TMS datasets coming through from healthy volunteers. These practice runs set you up to test patients with skill and confidence.

- Cathy Stinear, PhD

- Our first site was released to enroll – University of Cincinnati!!
- Who will be the next site?!

Key Action Items for Completion of Trainings

- Online Training modules for all study staff
- Practical TMS training on healthy volunteers
 - The last step for fast-track sites to have site readiness calls and be released to enroll!!
- TMS technique check by VERIFY leadership/consultants for standard TMS sites
 - The last step for standard sites to have site readiness calls and be released to enroll!!

Other Study Updates

- MOP v1.0 is accessible in the "Toolbox" tab of WebDCU.
- All TMS operators & TMS assistants need to be listed on the DOA. Only the TMS operators (not the assistants) need to complete the study's TMS training prior to performing the procedure on participants.
- All TMS operators are to upload their healthy volunteer training certificate in WebDCU under the People Document section. This is the only TMS training certificate that should be uploaded to WebDCU.

TMS Operators need to be given the green light email from the VERIFY team before proceeding with healthy volunteer TMS training

- We recommend that TMS operators complete 1 healthy volunteer TMS session & wait for feedback before proceeding with the next healthy volunteer TMS session. This way, TMS operators can incorporate feedback and make corrections before performing their next healthy volunteer TMS session.
